PROFILE

Software developer with over three years of shipping production web applications. Currently at Enjaz, Qi Card's technology arm, building Vue 3 and TypeScript systems for Iraq's oil sector and Svelte mini apps for the SuperQi super app. Full-stack background in React, Next.js, Node.js and PostgreSQL, including deploying and running my own servers. Computer Science graduate, Artificial Intelligence track.

EXPERIENCE

Software Developer — Enjaz (Qi Card) · Full-time Jul 2025 - Present

- Build and maintain Vue 3 + TypeScript front ends (Pinia, PrimeVue, Vuetify) for government oil-sector platforms covering fuel cards and warehouse operations.
- Work on Oil Coupon, the system Iraqi households use to collect their kerosene and LPG allocations: the admin dashboard and the citizen mini app inside SuperQi (Svelte 5, SvelteKit), used by over one million families.
- Rewrite legacy modules into typed, component-based code and resolve high-priority bugs and performance issues in systems used daily by thousands of people across Iraq.
- Deliver Arabic-first, right-to-left interfaces alongside .NET back-end, QA and product teams.

Freelance Software Developer — Self-employed 2024 - Present

- Websites and digital menus for cafes, including a board-game cafe and a cybercafe, a Zoho CRM setup for a clinic, and a photography portfolio.

Junior Software Developer — Alrabiaa TV · Part-time Feb 2025 - Jun 2025

- Built an event ticketing platform with interactive seat maps (Seats.io): admin dashboard and customer booking site.
- Designed the data model and a Node.js/Express API that syncs venue charts, zones and seats with Seats.io.

Junior Software Developer — PureTik · Full-time Jun 2024 - Jun 2025

- Main developer on Dr.Lab, an Electron desktop app for medical lab management, with a serial-key licensing API and barcode label printing; also built drNote, a clinic notes app.
- Built Karada Store ([karadastore.iq](#)), a multi-vendor e-commerce platform with Qi Card installments, shipping integration and WhatsApp OTP sign-in, using Next.js, Express, Prisma and PostgreSQL.
- Deployed and operated production on self-managed VPSs: Nginx, PM2, PostgreSQL, Certbot and S3-compatible storage.

Assistant Trainer — Aon.iq · Part-time Oct 2024 - Dec 2024

- Supported the lead trainer on a front-end development course: lectures, daily stand-ups on weekly tasks, debugging help, and tracking scores and attendance.

Front-End & UI Design Intern — Makers of Baghdad Jul 2023 - Aug 2023

- Redesigned the IoT KIDS website in Figma, rebuilt it from scratch in React and Bootstrap, and handled QA and performance checks.

Archive Officer — ZainCash · Full-time Jan 2023 - Feb 2023

- Maintained and organised customer records for the mobile wallet system.

EDUCATION

BSc Computer Science, Artificial Intelligence — University of Technology, Baghdad 2020 - 2024

- Graduation project: age estimation from face images using Support Vector Machines (Python, OpenCV, FG-NET dataset).

Full-Stack Web Development Bootcamp — Aon.iq Oct 2023 - Feb 2024

- Intensive in-person programme from HTML, CSS and JavaScript to React, Next.js, Node.js and Express.

SKILLS

Front end	TypeScript, JavaScript, Vue 3, Pinia, PrimeVue, Vuetify, Nuxt, React, Next.js, Svelte 5, SvelteKit, Tailwind CSS, Ant Design
Back end	Node.js, Express, Prisma, PostgreSQL, SQLite, REST APIs, Python
Tools	Git, Linux systems, Arch Linux, Nginx, PM2, Electron, Figma, Jira, Postman
Languages	Arabic (native), English (fluent)
